

10th Annual Sustainability Conference

Smart Cities:

Transforming Cities for a New Era

Wednesday, March 6, 2019

August Wilson Center – Downtown Pittsburgh

Exponentially increased computing power has played an astounding role in driving urban growth in the 21st century. This powerful dynamic presents an opportunity to consider conscious urban planning in a new and "smarter," data-driven way. Across the globe, public and private industries are advancing new cutting-edge smart technology to more efficiently manage resources, thereby promoting sustainable development for improved environmental and social outcomes. These technologies span many applications, including energy grids, transportation, water utility systems, waste management, air quality, and public safety. Engineers, city planners, and scientists are implementing innovations such as predictive modeling, interconnected systems integration, and near-real-time smart infrastructure data analytics. Presenters at this year's conference will discuss these innovative practices and their significant, tangible benefits for cost savings, the environment and social equity. Come learn how Pittsburgh and other leading cities are positioning to reap the benefits of smart infrastructure for greater efficiency and quality of life.

Keynote:

Remaking Post-Industrial Cities via Smart Infrastructure

Dr. Donald Carter
Director of Remaking
Cities Institute
Carnegie Mellon University

Topics to be covered: Latest updates in "Smartifying" the City of Pittsburgh, smart technology breakthroughs, and research; the future of urban infrastructure; and societal impacts including the future of work and workforce development

Other Featured Speakers:

Grant Ervin and City of Pittsburgh Officials - Chief Resilience Officer, City of Pittsburgh
Thomas Guentner - Program Manager, Landforce
Dr. Katrina Kelly-Pitou, Energy GRID Institute, University of Pittsburgh
Karen Lightman - Executive Director, Metro21:Smart Cities Institute, Carnegie Mellon Univ.
Sean Luther - Executive Director, InnovatePGH
Christine Mondor, AIA, LEED AP - Principal, evolveEA
Scott Rowland, PE, Principal/Vice President, Langan
Anna Siefken - Executive Director, Scott Institute for Energy Innovation, Carnegie Mellon Univ.

Conference Hosted By:

The American Society of Civil Engineers (Pittsburgh Section)
The Environmental and Water Resources Institute (Pittsburgh Chapter)
Metro21: Smart Cities Institute, Carnegie Mellon University
Sustainable Pittsburgh / Champions for Sustainability

SUSTAINABLE PITTSBURGH

In Collaboration With:

The City of Pittsburgh Mayor's Office
American Public Works Association (Western PA Chapter)

PITTSBURGH
A MOST LIVABLE CITY
